Projects

Modernization of Positions and Rgl page

- Migration of Positions and Rgl page to angular and Dot Net Core.
- Charles Schwab is a bank, there websites contain many pages like balances, account summary, positions, rgl, history..., we are working on positions and rgl page for them.
- We are using Angular framework to build user interface and DotNetCore MVC for api.

Attendance management system

- The moto of this project was to build user friendly web page where a user can access his/her attendance or take attendance (who has authorization). It is based on html5, JavaScript, CSS, MySQL

Learn Angular

- The moto of this project to provide Questions and their corresponding answers, video reference and link in a one place thus a job seeker guy can get every relevant content at one place (currently in progress)
- Technology used: JavaScript, Html, CSS)
- To View, Visit Link: - <https://shivankgo.github.io/jobHunters/>
